SUMMARY

Third-year B.Tech Computer Science (AI) student with interests in Machine Learning and Cybersecurity. A curious learner who enjoys exploring network security concepts, building practical projects and continuously improving technical skills.

EDUCATION

GL Bajaj Institute of Technology and Management, Greater Noida <i>B.Tech in Computer Science and Engineering (AI) – CGPA: 8.13</i>	2023 – 2027 <i>Uttar Pradesh</i>
St. Joseph's Convent School, Ramnagar <i>Senior Secondary – Percentage: 87.6</i>	2022 – 2023 <i>Uttarakhand</i>

TECHNICAL SKILLS

Programming: Python, C/C++, HTML/CSS, JavaScript

Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, BeautifulSoup, Requests, TensorFlow, Keras

Development Tools: VS Code, Anaconda, PyCharm, Git, GitHub, Jupyter

Security Tools: Wireshark, Cewl, John The Ripper, Nano Editor, Burp Suite, SETToolkit, Crunch

Platforms: Kali, Debian, Linux, Vercel, Streamlit, Render

EXPERIENCE

Artificial Intelligence & Data Analytics Intern <i>Edunet Foundation</i>	Apr 2025 – May 2025 <i>Remote</i>
- Built a classification model for animal species using a 90-image dataset - Worked with TensorFlow, Keras, and key Python data science libraries - Performed data preprocessing, visualization, model training, and evaluation	

PROJECTS

AI Powered Student Performance Prediction System Python	2026
- Executed a Flask-based full-stack app with Random Forest ML model for student performance prediction - Developed an interactive dashboard using Chart.js for real-time analytics and data visualization - Implemented authentication, search, and CSV-based data persistence using Pandas & NumPy	
Multi Class Animal Recognition Python	2025
- Implemented CNN-based image classification - Achieved accurate multi-class prediction through transfer learning - Utilized TensorFlow, Keras, NumPy, Matplotlib, and MobileNetV2	
Brute Force Attack Simulator Python	2026
- Developed a Python-based brute force attack simulator using a wordlist to demonstrate password cracking techniques - Implemented file handling and iterative password testing to simulate real-world credential attack scenarios - Simulated brute-force attacks to analyze password vulnerabilities and emphasize secure authentication practices	

CERTIFICATIONS

- Palo Alto Networks:** Network Security Fundamentals, Cybersecurity Academy Orientation, Cybersecurity Foundation
- Oracle:** AI Foundations Associate
- MasterCard:** Cyber Security Job Simulation
- AWS:** Machine Learning Basics
- MongoDB:** Vector Search Fundamentals, Semantic Search for AWS Users, Introduction to AI and Vector Search
- Cisco:** Python Essentials 1, IT Customer Support Basics

ACHIEVEMENTS

- Aim Overseas:** English Scholarship Test - Gold Medal (TOP 50)
- GATE 2026:** Qualified - AIR 26568

COURSEWORK / CORE SKILLS

• Data Structures and Algorithms • Object-Oriented Programming • DBMS • Operating Systems • Computer Networks
